\$5,000
GRAND PRIZE!

WEEKLY
PRIZES!

With more opportunities to make your bill even lower, everyone can be a winner—it all starts with just a click. Take our free Online Home Energy Survey by Oct. 31 and you will have the chance to win one of our weekly prizes, like a smart thermostat, and be automatically entered to win a \$5,000 Smart Home Energy Makeover. ➤ FPL.com/EasyToSave

Ask the Energy Expert

Q I'm hoping you can help settle a bet. A friend of mine thinks leaving her A/C fan setting on "auto" uses more energy. Which A/C fan setting actually costs more – "on" or "auto?"

– Victoria I., from Port St. Lucie

A The on/auto switch on your A/C can affect the price you pay to cool your home. We recommend keeping it set to "auto."

Celebrating Electric Vehicles

Electric vehicles (EVs) are cleaner and more affordable than gas-powered cars and are equipped with the latest technology. Join us as we celebrate National Drive Electric Week, Sept. 10-18. Learn more: [» FPL.com/EV](http://FPL.com/EV)

Preventing lightning from zapping your service

Lightning is a major cause of power outages and flickers. See what we're doing about it and get tips to protect your home. Learn more: [» FPL.com/LightningLab](http://FPL.com/LightningLab)

Protect yourself from scams

If you download a mobile app claiming to be FPL that requires you to provide personal information, do not enter your account information and delete the app immediately. Read more: [» FPL.com/protect](http://FPL.com/protect)

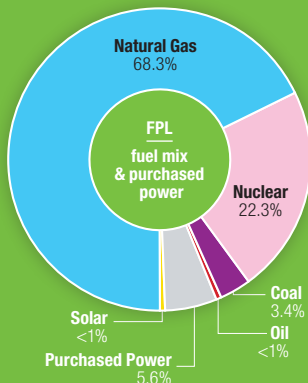

Storm charge adjustment

A routine adjustment to the storm charge portion of your bill takes effect this month. Adjusted up and down periodically during the year with Florida Public Service Commission approval, this charge helps pay for previous hurricane restoration costs and replenish the reserve for future storms. Effective September 1, the storm charge rate will decrease to \$1.17 per 1,000 kWh for residential customers. View information about your rates: [» FPL.com/rates](http://FPL.com/rates)

How we measure up

At FPL, we use mostly U.S.-produced clean fuel sources to generate the energy you use to power your home.

Sources of electricity generation for the 12 months that ended on June 30, 2016

See how we compare to the rest of the nation.

Major energy sources and percent share of total U.S. electricity generation in 2015

Help for customers in need
